Service

Status Rollups

We have introduced a roll up of status counts to improve performance of the application.

Contact Person Data Destruction

Pulse facilitates the destruction of personally-identifiable contact person data.

Depending on configuration, this can be done from the contact person record in the main application, from the client portal, and on a cycle after a configured number of days since the record was hidden.

Access to this functionality is restricted on both the main application and the client portal.

More Info URL

New field on the Catalogue Item that allows you to set a url to indicate more information, eg a link to a physical product on a Supplier site

Hide financial columns on insurance parts grid

On Incident interface insurance replacement parts grid.
